

MDT500 AUTOMATIC DOG TAG EMBOSSING MACHINE

TAGGING

The MDT500 Dog Tag Embosser/Debosser has been developed exclusively for the military and is ideal for instant, fully automatic issuance of dog tags. It features a fixed format so that no adjustments or set-up are required, and it can store up to ten standard formats. Tags can also be created off-line using the included keyboard. As tags are created, they are ejected to an output hopper that holds up to 70 tags. A separate hopper collects rejected tags.

Windows software allows easy interface with external databases for easy and efficient production of tags. The system requires a password to prevent unwanted access.

SPECIFICATIONS

Size	21"W x 19"D x 11.5"H		
Weight	95 lbs. (shipping weight 150 lbs.)		
Electric	117V 60Hz / 230V 50Hz 3.6V lithium battery backup		
Operating Environment	50°F to 95°F (10°C to 35°C) 20% to 85% humidity		
Interface	RS-232 serial port
