

M10HE METAL TAG EMBOSSE

The M10 Tag Embosser is an economical solution for creating small quantities of embossed or debossed metal tags. Compact and relatively lightweight, it can be used for tabletop or portable tagging needs. One unit can accommodate a variety of tag sizes, and the fixturing is designed to accommodate military dog tags.

Once your tag is in position, turn the top wheel to select the character to be marked. Then simply pull the handle and the M10 embosses the character and automatically spaces to the right. It also features a correction device that allows you to backspace and re-emboss a character.

SPECIFICATIONS

Size	11"W x 17.4"D x 10.23"H (crate size 20" x 24" x 18")
