

INDENT MARKER

INDENTING

Simple, permanent marking of soft materials.

Pannier's Model 7687-A Indent Marker is a friction-driven unit consisting of a frame and quick-change type wheel. The wheel utilizes cast aluminum type to indent characters into soft or semi-resilient material. The marker is placed over a conveyor to mark material as it passes underneath the unit. It is mounted on a 1.5" diameter pivot bar and uses pressure, supplied by an air cylinder or screw arrangement, to apply indenting force to the wheel.

The type wheel holds up to nine pieces of type with a character size of 2-9/16".

Dimensions: 18.25"L x 6.12"W x 8"H (without type)
