

ROOVERS METAL TAPE EMBOSSE

Manual tag embossing machine for low volume tag making.

Simple and economical Roovers metal tag embossing machines use rolls of metal "tape" to create deeply embossed or debossed tags for heavy-duty tagging applications. Using a character selection wheel, characters are embossed one at a time by pulling a handle. Create tags in variable lengths with holes or slots at both ends for nailing, tying, or welding in place for lasting product identification.

Characters on the Dial: ABCDEFGHIJKLMNOPQRSTUVWXYZ#,-/123456789

Tape is supplied in convenient, pre-measured rolls in various materials and sizes for a variety of applications such as:

- labels for pipe, hose, and cable
- part tracking through painting and galvanizing
- utility pole tags
- in-mold identification of metal castings and tires
