

# SIMPLE SPREADSHEET APP

Pannier's Simple Spreadsheet Application makes marking on nameplates and tags fast and easy. Install the app on a Windows 7 or later PC with Microsoft Excel and connect the PC to the AC500 with the included cable.

The Excel spreadsheet contains a column for each field that needs to be marked. Enter the information to be marked into the designated columns and you're ready to mark.

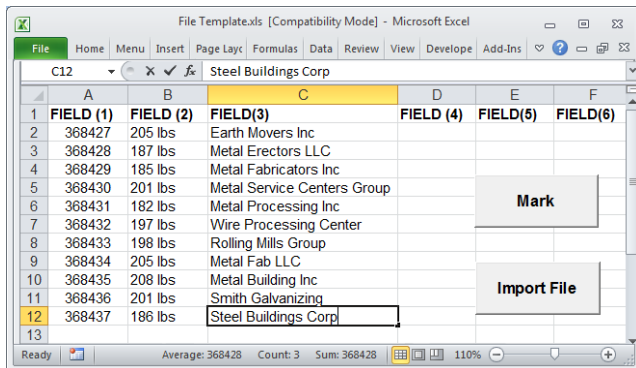

## STEP 1

Set up your marking pattern on the AC500 controller. Create a Text field or Data Matrix field for each column of data you will have in your spreadsheet.

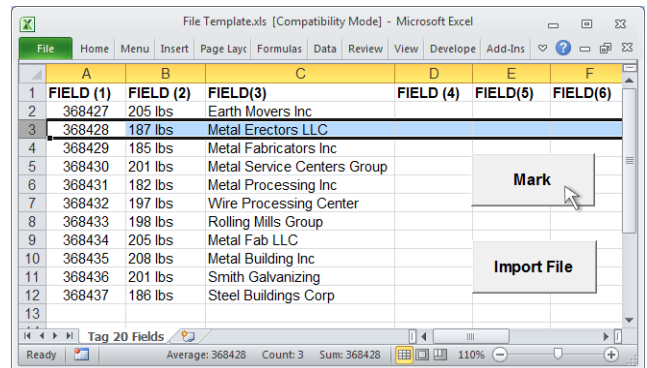

## STEP 2

Secure a nameplate or tag into the holding fixture.

## STEP 3

Type or paste the information to be marked into the columns of the spreadsheet. If data is stored in a CSV file, click the **Import File** button to import all data.

## STEP 4

Select a row to mark and click the **Mark** button. The dot peen machine will mark all data on the nameplate.

Nameplate Indenting

Indenting Heavy Plates

Metal Tag Embossing
