SECTION 4 - FIRST AID MEASURES**Inhalation:** If symptoms develop, move victim to fresh air. If symptoms persist, obtain medical attention.**Skin contact:** Promptly flush skin with water until all chemical is removed.**Eye contact:** Immediately flush eyes with large amounts of water for at least 15 minutes, lifting eyelids occasionally to facilitate irrigation.**Ingestion:** Not considered dangerous.**SECTION 5 - FIRE FIGHTING MEASURES****Suitable extinguishing media:** Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.**Specific hazards arising from the chemical:** When exposed to fire, burning organic pigment products may evolve noxious, toxic gases, carbon monoxide, carbon dioxide, nitrous oxide, or hydrogen chloride depending upon pigment type used in the dispersion. All water must be driven off first in order for this to occur.**Special protective equipment and precautions for fire-fighters:** Wear self-contained breathing apparatus for firefighting if necessary. The wet ink is not flammable. The bulk of the ink will not burn. If heated to dryness, the remaining organic polymers and pigments, although difficult to ignite, will burn as a class IIIB fire. It is recommended that containers be tightly closed and isolated from heat, electrical equipment and flame. A closed container could possibly explode when exposed to extreme heat.**SECTION 6 - ACCIDENTAL RELEASE MEASURES****Personal precautions, protective equipment, and emergency procedures:** Surfaces may be slippery. Avoid breathing vapors, mist or gas. For personal protection see Section 8.**Environmental precautions:** No special environmental precautions required. Avoid discharge into
