Material Safety Data Sheet
RAEC-WS 010 CLEANER

1. Product and company Identification

1.1 Commercial product name
RAEC-WS 010 Cleaner

1.3 Chemical Characterization
Preparation of polar organic solvents and auxiliary materials.

1.4 Emergency telephone: Infotrac 24-hour telephone # 1-800-535-5053

2. Hazards Identification

2.2 Special hazards for human health and environment

3. Composition/Information on Ingredients

3.2 Hazardous components

4. First Aid Measures

4.1 After inhalation:
In case of accident by inhalation, remove victim to fresh air and keep at rest. Consult physician

4.2 After contact with skin:
After contact with skin, immediately take off all contaminated clothing, and immediately wash skin with plenty of water and soap.

4.3 After contact with eyes:
Take off lenses. Immediately flush eyes with plenty of flowing water for 10 to 15 minutes holding eyelids apart. Consult physician.

4.4 After ingestion:
Calm the victim. Rinse mouth thoroughly with water. Immediately get medical attention. Let water be swallowed in little sips (dilution effect). Do not induce vomiting. Milk or fat oils are strongly contraindicated. Do not allow the victim to drink a neutralization agent.

5. Fire Fighting Measures

5.1 Suitable extinguishing media: Alcohol resistant foam. Carbon dioxide (CO2). Dry extinguishing powder. Water spray. Atomized water.

5.2 Unsuitable extinguishing media: High power water jet

5.3 Special hazards arising from the chemical: In case of fire may form: Carbon monoxide. Nitrogen oxides (NOx). Vapors may form explosive mixtures with air.

5.4 Protective equipment and precautions for firefighters: Wear a self-contained breathing apparatus and chemical resistant suit.

5.5 Additional information: Temperature class T 1 (Ignition temperature: >450 °C)

6. Accidental Release Measures

6.1 Personal precautions: Provide fresh air. Avoid contact with skin and eyes. Wear suitable gloves. NR (Natural rubber (Caoutchouc), Natural latex). NBR (Nitrile rubber) limited resistance, Butyl rubber. In the cases of special applications, it is recommended to check the chemical resistance with the manufacturer of the gloves. Wear eye/face protection. If technical suction or ventilation measures are not possible or are insufficient, protective breathing apparatus must be worn. The filter
class must be suitable for the maximum contaminant concentration (gas/vapor/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used. See protective measures under sections 7 and 8.

6.2 **Environmental precautions:** Due to danger of explosion, prevent leakage of vapors into cellars, flues and ditches. Do not empty into drains or the aquatic environment. Explosion hazard.

6.3 **Methods for cleaning up/taking up:** Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Clean contaminated objects and areas thoroughly observing environmental regulations. Treat the assimilated material according to the section on waste disposal. (13)

6.4 **Additional information:** Keep away from sources of ignition. No smoking. Do not breathe gas/fumes/vapor/spray. The product is partially water mixable.

### 7. Handling and Storage

#### 7.1 Advice on safe handling
When handling with chemicals, please consider usual precautionary measures. Wear suitable protective clothing, gloves and eye/face protection. See protective measures under point 7 and 8. Do not leave the container open. Handle open container with care. Keep container tightly closed. If technical suction or ventilation measures are not possible or are insufficient, protective breathing apparatus must be worn. When using do not eat, drink or smoke. Protect skin by using skin protective cream. Wash hands when done working with material; at breaks, lunch, shift changes, etc. Keep away from food, drink and animal feeding stuffs. Never clean the skin or the clothes with the preparation!

#### 7.2 Advice on protection against fire and explosion
The vapors are heavier than air and can accumulate in high concentrations on the ground, in cavities, channels and cellars. In use, may form flammable/explosive vapor-air mixture. Take precautionary measures against static discharges. Keep away from sources of ignition. No smoking. Highly flammable.

#### 7.3 Further information on handling
Vapors / aerosols should be extracted by suction directly at point of origin. See information supplied by the manufacturer. For limiting the emission through volatile organic compounds (VOC), the solvent vapors should be forwarded to an emission control facility. Please note the manufacturer indications for storage conditions and shelf life (see section 7.3) When storing outside the recommended storing temperatures, the shelf life can be shortened. Inappropriate storage may conduct to endangerment of persons and environment.

#### 7.4 Requirements for storage rooms and vessels
Keep only in the original container in a cool, well ventilated place. Keep container tightly closed. Use appropriate containers, e.g. UN-approved HDPE or thin sheet packing, for decanting. In partially or completely disposed containers, there can be an accumulation of a potentially explosive atmosphere in their head space. Rooms, in which inks are stocked, have to be equipped with sufficient air ventilation. Remove all sources of ignition. Protect against high warming or solar radiation. Recommended storage temperature: +15 °C - 25 °C. Highly flammable. Maximum period of storage (time): 24 months

### 8. Exposure Controls/Personal Protection:

#### 8.1 Exposure limit values:

</tbody>
</table>

**Exposure controls**

**Occupational exposure controls** Technical measures and the application of appropriate methods of operation, as indicated in section 7, have precedence over to the application of personal protection equipment.

**Protective and hygiene measures:** Protect skin by using skin protective cream. Wash hands when done working with material; at breaks, lunch, shift changes, etc.

**Respiratory protection:** If technical suction or ventilation measures are not possible or are insufficient, protective breathing apparatus must be worn.

</tr>
</tbody>
</table>

**Hand protection:** Type of chemical protective gloves to choose depends on the concentration and quantity of dangerous substances as well as on work place specifications. In the cases of special applications, it is recommended to check the chemical resistance with the manufacturer of the gloves.

**Eye protection:** Tightly sealed safety glasses.

**Skin protection:** Carry long-sleeved, flame impeding and anti-static labor safety clothing.

**Environmental exposure controls:** Please see sections 6 and 7

Rev. No. 6.06
8.8 **Additional advice on control parameters**: Definition for section 8.1. H = absorbed by skin

9. **Physical and Chemical Properties**

9.1 **Appearance**

Form: liquid
Color: colorless
Odor: like acetone

9.2 **Important health, safety and environmental information**

- pH-Value (at 20 °C): not determined DIN 19268
- Melting point: not determined DIN 53181
- Boiling point: 79 – 110°C DIN 51751
- Flash point: -18°C DIN 51765
- Explosive properties: Vapors may form explosive mixtures with air
  - Lower explosion limits: 2.6 vol % DIN 51649
  - Upper explosion limits: 13 vol % DIN 51649
- Oxidizing properties: not determined DIN 51794
- Vapor pressure (at 20°C): 233 hPa DIN 51754
- Density (at 20°C): 0.79 g/cm³ DIN 53217
- Water solubility (at 20°C): 250 g/L
- Partition coefficient: not determined DIN 503018
- Viscosity/dynamic (at 20°C): 0.5-1 mPas
- Viscosity/Kinematic (at 20°C): not determined
- Vapor density: (at 20°C): >1
- Evaporation rate (at 20°C): not determined DIN 51755
- Solvent separation test: not determined

9.3 **Other information**

- Ignition temperature: 460°C DIN 51794
- VOC: 100%
- Maximum period of storage (time): 24 months

10 **Stability and Reactivity**

10.1 **Stability**: Stable

10.2 **Conditions to avoid**: High warming > 45°C and / or solar radiation. Heating up forwards the transit of liquid to the vapor phase and the accumulation of potentially explosive atmosphere.

10.3 **Materials to avoid**: Keep away from strong acids, leachates, heavy metal salts and reducing materials

10.4 **Hazardous decomposition products**: Keep away from strong acids, leachates, heavy metal salts and reducing materials.

10.5 **Possibility of Hazardous Reactions**: None

10.6 **Additional information**: This product is stable

11. **Toxicological Information**

**Acute toxicity**

- Acute toxicity, oral rat. LD50: 5800 mg / kg / acetone, propan-2-one, propanone
- Acute toxicity, dermal rabbit. LD50: 20000 mg / kg / acetone, propan-2-one, propanone
- Acute toxicity, inhalant rat. LC50: 50, 1 mg/l/8h/ acetone, propan-2-one, propanone

**Specific effects in experiment on an animal**: For this product there are currently no toxicological data available.

**Corrosive and irritant effects**: For this product there are currently no toxicological data available.

**Sensitising effects**: For this product there are currently no toxicological data available.

**Severe effects after repeated or prolonged exposure**: For this product there are currently no toxicological data available.

**Carcinogenic/mutagenic/toxic effects for reproduction**: For this product there are currently no toxicological data available.

**Additional information on tests**: For this product there are currently no toxicological data available.

**Empirical data on effects on humans**: For this product there are currently no toxicological data available

**Further information**: Prolonged/repetitive skin contact may cause skin defattening or dermatitis. Highly fat solubilising effect. Danger of cutaneous absorption. Inhalation may cause headache, drowsiness, somnolence and perception disorder. Eye contact may cause heavy irritation and oedema formation of the conjunctiva. May cause damage on liver, kidneys and nervous system. Aspiration after swallowing and vomiting may conduct to heavy lung damages.

12 **Ecological Information**

12.1 **Ecotoxicity**

- Bacterial toxicity: Pseudomonas putida: EC50: 1700 mg/l/16h/acetone, propan-2-one, propanone
- Acute Daphnia toxicity Daphnia magna: LC50: 12600-12700 mg / l/48 h/ acetone, propan-2-one, propanone
12.2 **Mobility**: Liquids partly soluble with water. The hazardous ingredients evaporate rapidly, when you clear them to the environment. In grounds: a moderate to high mobility of the solvents used in the preparation can be expected.

12.3 **Persistence and degradability**: Dangerous components: Solvents are biologically degradable. The used colorants are difficult to dissolve in water. Colorants are, according to regulations, very resistant and therefore, under the conditions of clarification plants or surface water poorly bio-degradable.

12.4 **Bioaccumulative potential**: No indication of bio-accumulation potential

12.5 **Other adverse effects**: Water risk class: 1 Mild water pollutant

12.6 **Further information**: Eco-toxicological data have not been identified especially for this preparation. The indicated information is based on the current state of knowledge of the used materials and of similar products. It should not reach the canalization, the ground or the waters. With an appropriate handling and application any ecological problems are not to be expected.

13 **Disposal Considerations**

13.2 **Contaminated packaging**: Waste disposal according to official state regulations.

14 **Transport Information**

14.1 **Transport regulations cited according to international regulations**:
